California Institute of Technology  
DIVISION OF CHEMISTRY AND CHEMICAL ENGINEERING

RESEARCH OPPORTUNITIES FOR POSTDOCTORAL SCHOLARS

The Division of Chemistry and Chemical Engineering at the California Institute of Technology invites applications for Postdoctoral Scholar appointments in the various fields of interest to the Division. In chemistry, new postdoctoral scholars may be appointed during the coming year in the fields of biochemistry, chemical physics, organic chemistry, inorganic chemistry, theoretical chemistry, electrochemistry, and structural chemistry. Research opportunities in chemical engineering include atmospheric chemistry, chemical reaction engineering, bioengineering, fluid mechanics and transport phenomena, catalysis, surface chemistry, and polymeric materials.

Postdoctoral appointments are by individual arrangement with the faculty member concerned. Listing of faculty and their research can be found on Division of Chemistry and Chemical Engineering web site: http://ce.aittech.edu

Those seeking postdoctoral appointments should write directly to the faculty member whose research is of interest in order to determine whether positions and funding are currently available. Direct inquiries to the professor at either the Chemical Laboratories, Mail Code 164-30 or the Chemical Engineering Laboratories, Mail Code 210-41, California Institute of Technology, Pasadena, California 91125.

Caltech is an Affirmative Action/Equal Opportunity employer.  
Women, minorities, veterans and disabled persons are encouraged to apply.
